MATERIALS - We are committed to providing our customers with the best product for the best price. We only use top quality materials to produce the parts found in this catalog. If you ever have any questions about the materials, please feel free to contact us at any time.

The OVERLAYS we produce are made from UV treated polycarbonate that is weather resistant. We use UV ink that is designed to withstand the outside elements. Combined, these materials make a rugged and robust product that maintains it's durability even with everyday use.

02

03

The MEMBRANE SWITCH keypads that we produce are made for premier performance. We source our raw materials with functionality and durability in mind. Our switches reach across the U.S. and the globe to serve a wide variety of industries.

The LENSES we provide are made from tough, UV stabilized polycarbonate. We choose to use this specific material because it is crack-resistant, and it is resistant to yellowing and discoloration when placed in direct sun light.
